Daily Weather Threat Briefing

Regional Operations Center

Western Region

Sunday, July 3

9:00 AM PDT

Day 1 (Monday): Cooler temperatures continue for most areas, with mainly minor heat risk impacts over the southern deserts. Breezy winds in many areas will bring locally elevated fire weather conditions for the afternoon and evening.

Weather Key Points

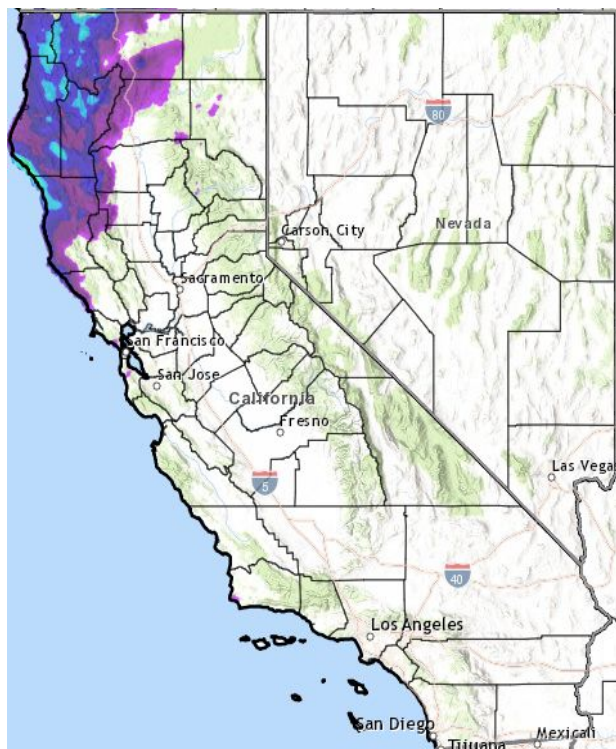

Regional Operations Center

Western Region

Sunday, July 3

- Near to even below normal temperatures will persist over much of the state into mid week, with mainly minor heat risk concerns across the southern California deserts
 - Much warmer temperatures are forecast to return to many areas late in the week and into the weekend
- Fire weather conditions will remain locally elevated most afternoons and evenings for mountain and foothill locations, the southern deserts, and the Sacramento Valley at times due to normal breezy conditions each day
 - At this time, widespread critical fire weather (Red Flag) conditions are not expected
- Showers linger into Tuesday for far northern California, otherwise, dry conditions are expected through the week

Precipitation Forecast

Monday

Tuesday

Wednesday

Note: Forecast precipitation amounts are an average for any particular location. Thunderstorms may produce locally higher rainfall amounts.

Precipitation (inches)

Heat Risk

Regional Operations Center
Western Region
Sunday, July 3

Monday

Tuesday

Wednesday

Green	Level 0	No Elevated Risk
Yellow	Level 1	Low Risk for those extremely sensitive to heat, especially those without effective cooling and/or adequate hydration
Orange	Level 2	Moderate Risk for those who are sensitive to heat, especially those without effective cooling and/or adequate hydration

Red	Level 3	High Risk for much of the population, especially those who are heat sensitive and those without effective cooling and/or adequate hydration
Magenta	Level 4	Very High Risk for the entire population due to long duration heat, with little to no relief overnight

Weather Outlook (6-14 Days)

Regional Operations Center

Western Region

Sunday, July 3

6-10 Day Outlook (July 9- July 13)

Temperatures

- Near normal temperatures favored across much of California, with above normal temperatures favored across far southeastern California, and below normal temperatures favored across northwestern California

Precipitation

- Below normal precipitation is favored across eastern California, with near normal precipitation amounts favored for the remainder of the state

8-14 Day Outlook (July 11 – July 17)

Temperatures

- Above normal temperatures are favored across the northern two thirds of California, with near normal temperatures favored across southern California.

Precipitation

- Below normal precipitation is again favored across northern and eastern California, with near normal precipitation favored for the rest of the state

Risk Assessment Matrix

Regional Operations Center

Western Region

Sunday, July 3

Impact Level Definition

- 1. Impactful weather is not expected.**
- 2. Potential threat to lives and property if no/incorrect actions are taken.**
 - Localized impacts on commerce possible.
 - Includes events that occur frequently.
- 3. Potential threat to lives and property if no/incorrect actions are taken.**
 - Impacts on commerce possible.
 - Includes events that occur a few times per year.
- 4. Actions likely needed to save lives and/or property.**
 - Significant impacts to commerce possible.
 - Includes events that occur infrequently.
- 5. Actions required to save lives and/or property.**
 - Significant and extended impacts to commerce.
 - Includes exceptionally rare events.
